16 fl. oz. (473 mL)

ABSORBINE

The Horse World's Most Trusted Name®

MEDICATED SHAMPOO

FOR USE ON HORSES: Absorbine® Medicated Shampoo is an effective shampoo used as a skin cleanser for Rain Rot, Ringworm, Girth Itch, Summer Itch, Tail Itch, Grease Heel (Scratches) and other bacterial infections. Absorbine® Medicated Shampoo will remove grime, sweat, scabs and debris, keeping skin clean and soft.

DIRECTIONS: For use on entire horse: Use 2 or 3 ounces of shampoo in a bucket of water. Wash entire horse as you normally would. Leave shampoo on 2 or 3 minutes before rinsing.

For use on affected areas only: Apply shampoo full strength to a wet sponge and clean affected areas. Leave on about 5 minutes and rinse off thoroughly.

For initial treatment, shampoo your horse twice weekly. As skin condition improves, reduce shampooing to once a week. For best results, follow with Absorbine® Medicated Spray. If using in conjunction with Medicated Spray, apply two times daily in between shampooing.

To speed treatment, horses with Rain Rot should be kept in dry conditions.

FOR USE ON DOGS:  Absorbine® Medicated Shampoo aids in the treatment of hot spots, dermatitis, dry, flaky skin, ringworm and other bacterial skin infections.

DIRECTIONS: For use on entire dog: Wet coat thoroughly. Apply sufficient amount of Absorbine® Medicated Shampoo and lather well into hair coat. Contact with the affected skin is important. Leave shampoo on for 5 minutes. Rinse thoroughly. For best results, apply Absorbine® Medicated Spray to dry coat.

For use on affected areas only: Apply shampoo full strength to a wet sponge and clean affected areas. Leave on about 5 minutes and rinse off thoroughly. For best results, apply Absorbine® Medicated Spray to dry coat.
