

Merck Animal Health offers vaccines you can trust.

For years, horse owners have trusted Merck's safe and effective line of equine vaccines as part of their veterinarians' recommended total healthcare program for horses. These products consistently deliver quality, effectiveness, and reliability, as well as ease of administration.

Tetanus Toxoid	Tetanus	Super-Tet® with Havlogen® 	Tetanus Toxoid	
West Nile	West Nile	Equi-Nile™ with Havlogen® 	West Nile Innovator	Recombitek

Havlogen® is Merck Animal Health's exclusive adjuvant.

Our vaccines contain the adjuvant Havlogen® which produces a booster effect stimulating long-lasting protection through the slow release of antigens. It allows concentration of antigen (a substance to which an immune response is mounted) while minimizing adverse reactions. It also stays in suspension and doesn't settle to the bottom of vial for consistency and potency in each dose.

Call your Merck Animal Health representative or distributor sales representative to learn more.
