

Wintec® saddles have always made riding easy and comfortable. Combine world-leading innovations with hi-tech materials into lightweight, weatherproof and easy-care saddles and it's easy to see why Wintec® is the world's number one synthetic saddle!

Performance Systems

For the ultimate in horse comfort and rider peace of mind...

Wintec® saddles featuring world leading performance systems, CAIR Cushion System and EASY-CHANGE Fit Solution, offer the ultimate in ease of fitting and comfort. These revolutionary systems work together to provide a custom fit and a fluid cushioning to hug the horse's individual conformation for even weight distribution over the entire length of the panel.

FlexiContourbloc

Anatomically contoured, the rider's leg will fit in and behind the FlexiContourbloc to support their individual position. Demonstrate moving the FlexiContourbloc forwards, backwards, or on the precise angle to mirror individual riding position.

Flexibloc

Demonstrate how a Flexibloc can be moved or completely removed to accommodate the desired rider support. Flexibloc pairs can also be purchased in different sizes allowing complete rider customization.

Adjustable Ergonomic Stirrup Bars

Show riders how to achieve effortless alignment by altering the positioning of the Adjustable Ergonomic Stirrup Bars, by lifting the catch, sliding the bar to one of three or four positions and closing the catch to secure it in place.

The comprehensive Wintec® range offers not only cutting edge designs, but new standards in fit, comfort and performance benefits for both horse and rider.

Equi-Leather

Equi-Leather is an exceptionally hard wearing synthetic material which has a smooth, leather-look finish and is the primary material in saddles such as the Wintec® 250 and 500 models.

Equi-Suede

Equi-Suede is a synthetic, ultra luxurious, soft, grippy and comfortable material which has a suede-like finish and provides great security in the seat and is the primary material in the Wintec® Pro and 2000 models.

Equi-Fabric

Equi-Fabric is featured on select models in the WintecLite range and is a durable and quick-drying synthetic material.

Equi-Leather Grip & Equi-Fabric Grip

The majority of Wintec® Saddles feature a unique fabric which provides added grip and stability beneath the saddle.

All Wintec® Saddles feature a generous panel designed to ensure a large 'footprint' on the horse's back, maximizing the weight bearing surface of the saddle.
