WHY DO YOU RIDE?TM

Read our manifesto at redmondequine.com

A hydrated horse is a healthy horse!

Your new daily routine: Feed 2 scoops a day for a hydrated and healthy horse!

Redmond Rock in a bag?

Redmond Rock Crushed is a completely natural mineral sea salt — the same blend of 60+ trace minerals found in our bestselling Redmond Rock, in a granular form for easy feeding.

How does it work?

Equine health trouble often begins with mineral deficiencies and dehydration. Redmond Rock is a perfect hydration trigger and provides the minerals and elements your horse needs to stay healthy. Redmond Rock Crushed makes it easy to vary the amount of salt and minerals your horse receives based on diet and activity levels.

Suggested Daily Portions:

Pasture Pet

Normal Recreation

Performance Horse

What's in this pouch?

Unrefined mineral salt and a 1oz. scoop.

DID YOU KNOW?

Dehydration can cause colic and other issues. Crushed **encourages drinking** and provides necessary trace minerals.

Guaranteed Analysis

MAJOR MINERALS (%)

| | |
|------------|------|
| Salt | 91.0 |
| Calcium | 0.35 |

A little about Redmond

We love horses, so we understand that when your horse feels good, you feel good. We provide natural, effective products that let you focus on what you love about your horse without worrying about their health.

"Crushed not only provides the important balance of salt and trace minerals but also encourages my horses to drink." – Julie Goodnight
