FEL-O-GUARD™ PLUS 3 + Lv-K

Elanco US

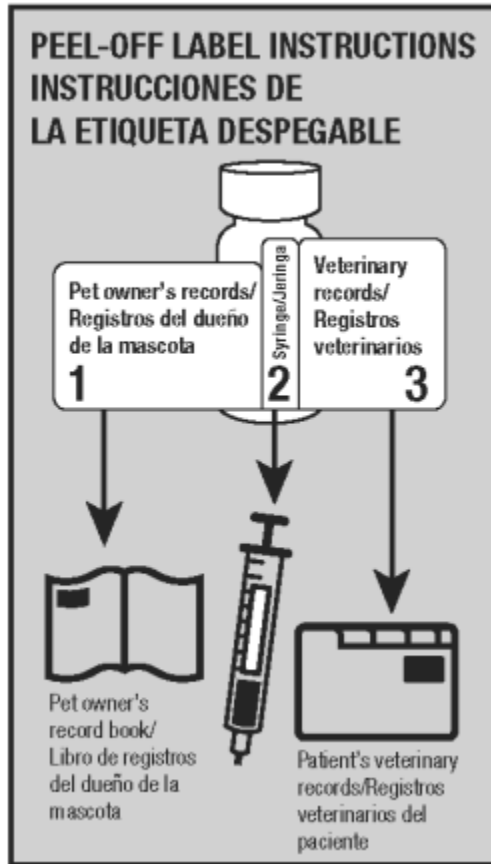

Feline Leukemia-Rhinotracheitis-Calici-Panleukopenia Vaccine

Modified Live & Killed Virus

For use in animals only

This product has been shown to be effective for the subcutaneous vaccination of healthy cats, eight weeks of age or older, against feline leukemia, rhinotracheitis, calici and panleukopenia viruses. For more information regarding efficacy and safety data, go to productdata.aphis.usda.gov.

Directions for Use: Aseptically rehydrate with accompanying diluent. Cats, inject (one) 1 mL dose subcutaneously using aseptic technique. Administer a second 1 mL dose three to four weeks later. The need for annual booster vaccinations has not been established for this product; consultation with a veterinarian is recommended. **Do not vaccinate pregnant queens.**

Caution: Store in the dark at 2° to 8°C (35° to 46°F). Avoid freezing. Shake well. In case of anaphylactoid reaction, administer epinephrine. Inactivate all unused contents before disposal. Do not mix with other products, except as specified on the label. In case of human exposure, contact a physician.

Thimerosal, neomycin, polymyxin B and amphotericin B added as preservatives.

Caution: In the absence of a veterinarian-client-patient relationship, Federal law prohibits the relabeling, repackaging, resale, or redistribution of the individual contents of this package.
