INFORCE™ 3

Zoetis

Bovine Rhinotracheitis-Parainfluenza₃-Respiratory Syncytial Virus Vaccine

Modified Live Virus

For intranasal use only

For veterinary use only

For vaccination of healthy cattle, including pregnant cows, for the prevention of respiratory disease caused by BRSV, and as an aid in preventing respiratory disease caused by IBR and PI₃.

Directions: Aseptically rehydrate the freeze-dried vaccine with the sterile diluent provided, shake well, and administer 2 mL intranasally (IN) using a cannula or a syringe with the needle removed. Place half the dose (1 mL) in each nostril. Calves vaccinated before the age of 6 months should be revaccinated after 6 months of age to avoid possible maternal antibody interference with immunization. Annual revaccination with a single dose is recommended.

Precautions: Store at 2°-7°C. Do not freeze. Use entire contents when first opened. Burn containers and all unused contents. Do not vaccinate within 21 days before slaughter. Contains gentamicin as preservative. As with many vaccines, anaphylaxis may occur after use. Initial antidote of epinephrine is recommended and should be followed with appropriate supportive therapy.

Technical inquiries should be directed to Zoetis Inc. Veterinary Services, (888) 963-8471 (USA), (800) 461-0917 (Canada).

U.S. Veterinary License No. 190

Zoetis Inc., Kalamazoo, MI 49007
