LEPTOVAX™ 4**Elanco US****Leptospira Canicola-Grippotyphosa-Icterohaemorrhagiae-Pomona Bacterial Extract**

Not intended for use as diluent for live vaccines.*

For Use in Dogs Only

This product has been shown effective for subcutaneous vaccination of healthy dogs 6 weeks of age or older against *Leptospira canicola*, *Leptospira grippotyphosa*, *Leptospira icterohaemorrhagiae* and *Leptospira pomona*. For more information regarding efficacy and safety data go to productdata.aphis.usda.gov.

Dose: Dogs, inject one 1 mL dose subcutaneously using aseptic technique. All dogs 6 weeks of age or older should receive one dose of LeptoVax 4 and a second dose 2 to 3 weeks later. The need for annual booster vaccinations has not been established for this product; consultation with a veterinarian is recommended.

Caution: Store in the dark at 2° to 8°C (35° to 46°F). Avoid freezing. Shake well. Burn container and all unused contents. In case of anaphylactoid reaction, administer epinephrine. Do not mix with other products, except as specified on this label. This product has not been tested in pregnant animals. In case of human exposure, contact a physician.

Gentamicin and thimerosal added as preservatives.

*** If the use of these Lepto serovars in combination with modified live vaccines is desired, products containing *Leptospira canicola*, *Leptospira grippotyphosa*, *Leptospira icterohaemorrhagiae* and *Leptospira pomona* are specifically designed and available for this purpose.**

Caution: In the absence of a veterinarian-client-patient relationship, Federal law prohibits the relabeling, repackaging, resale, or redistribution of the individual contents of this package.
