**NEOVAC® DA2*****NeoTech*****Canine Distemper-Adenovirus Type 2 Vaccine****Modified Live Virus**

**Directions:** For use as an aid in the prevention of disease due to Canine Distemper Virus and Canine Adenovirus Type 1 (infectious canine hepatitis virus). Aseptically rehydrate vaccine with diluent supplied. Inject 1 dose (1 mL) subcutaneously into dogs at least 42 days of age. Because there is potential for maternal antibody to interfere with the immune response to the original vaccination, revaccinate every 14 to 28 days until the dog is 16 weeks of age. Dogs over 16 weeks of age should receive a single dose (1 mL). Revaccinate annually with one dose.

**Precautions:** Store at 2-7°C (35-45°F). Shake well during rehydration. Do not vaccinate pregnant or lactating bitches, sick, or debilitated dogs. Occasionally, transient corneal opacity may occur following the administration of this product. In case of anaphylaxis; epinephrine, corticosteroids, and antihistamines may all be indicated depending on the nature and severity of the reaction. Gentamicin used as a preservative. Burn this container and all unused contents.

U.S. Veterinary License No. 472
