 Sodium Chloride • Calcium • Potassium • Magnesium

"I use Formula 707® products because it gives the best results, it's that simple."  
*Dr. William Miller*  
 Black-Hill of Farns Trainer

**2 SERVINGS**  
 NET WEIGHT: 60g

Electrolytes Chelated To Amino Acids For Rapid Bioavailability  
**Restore:** An electrolyte paste for use in athletic horses to help replenish electrolytes lost during times of stress, sweating, or hard exercise.  
**FOR VETERINARY USE ONLY**  
**Dose:** Insert paste as far to the rear of the mouth as practical. Deliver entire syringe, or give half one hour before the event and half immediately after. After administration you may rinse the horse's mouth with syringe filled with water if desired.  
**Ingredients:** Amino Acid Chelates with Electrolytes; Calcium, 600 mg; Magnesium, 600 mg; Potassium, 2 g; Sodium Chloride, 4 g; L-Glutamine, 100 mg; and Amino Acid, 22 g in a molasses base. We recommend use at room temperature – DO NOT FREEZE.  
 Patent applied for.  
**Manufactured For:** John Ewing Company, 410 North First Street, LaSalle, CO 80645 USA
