

CONTENDER® is the most complete, scientifically formulated hoof care product available. It combines key ingredients for maintaining hoof moisture while providing flexibility to the hoof wall, sole, heel, frog and coronary band. **CONTENDER®** is the only topical hoof dressing that contains both Hyaluronic Acid (HA) and MSM. HA acts as a moisturizer that attracts and retains water in the coronary band- the area responsible for the majority of hoof wall growth. MSM carries, penetrates and delivers sulfur- key to optimal hoof growth. Lanolin is for additional moisturization. Pine Tar and Iodine are to stimulate hoof wall growth. Essential amino acids, vitamins, and minerals round out the formulation for complete hoof health.
