TESTIMONIALS

“Thank you, Back on Track, for coming out with this wonderful product. Mother Nature seems to always now best. My horse is thriving on your Rosehip and best of all, Maggie eats all her food and even seems to lick the bucket. All natural, wonderful tasting, and full of goodness.” - Jason T. San Antonio, Texas

“I stopped feeding supplements a few years back, because it appeared as though they complicated my horses diet and threw it out of balance. Since I am a big fan of Back on Track products, I thought I would research the benefits of Rosehip and was pleased to see that its commonly used around the world, especially in Europe to improve overall wellness and health. I’ve been feeding it now for 3 months and LOVE it!” - Mary C. Pittsburgh, PA
