

**NEW** The first and only combination of natural Manuka Honey and MicroSilver BG™

# SILVER HONEY™

## RAPID WOUND REPAIR

The pure strength of Mother Nature's strongest antimicrobials transformed into the barn's favorite wound care.

Silver Honey Rapid Wound Repair spray and ointment heal rapidly, provide long-lasting protection and moisturize with formulas that are tough on bacteria and gentle on skin. They treat a range of skin conditions, such as cuts, abrasions, sores, rain rot, rashes, fungus, scratches, hot spots and burns.

Silver Honey is pH balanced, free of hypochlorous acid and safe for horses, dogs and all animals.

**Proven to stop 99.9% of bacteria immediately to start healing faster**

- Stimulates the body's immune response
- Provides natural debridement of wounds
- Promotes growth of new tissue
- Reduces inflammation

**Natural, medical-grade active ingredients**

- Supports healing without disrupting the skin's natural biome
- Repels insects from wounds with natural neem oil
- Prevents licking with bittering agent

**SILVER HONEY™**

**RAPID WOUND REPAIR**

**See the impact of Silver Honey Rapid Wound Repair.**

Ichabod the donkey injured his hock several years ago. The flesh of the wound site has always been marred and exposed. No topical solution applied seemed to improve it, until his owners tried Silver Honey a full two years later.

Two-year-old wound

Post-treatment with Silver Honey

After using Silver Honey Rapid Wound Repair for one month as directed, Ichabod's skin is growing much better with less scabbing. It's the most dramatic change we've seen in the two years of wound management.

– Dr. Michael Stewart, DVM
